PIMAPAY

A DIGITAL DISTRIBUTION CRYPTO-ASSETS PLATFORM FOR HUMANS

The inherent value of cryptocurrencies as an alternative payment method has gained critical mass adoption among investors, entrepreneurs, and consumers over the last few years. Such popularity would not be possible without the blockchain technology, which has taken a number of world banks and corporations on a quest to increase the efficiency of their services.

With PIMAPAY, usability issues, related to virtual currencies are resolved in an innovative way. The platform gathers the most popular cryptocurrency services and products into one portal allowing users to gain control over their finances, to manage transactions, to integrate merchants' payments, to deposit funds and so much more.

TECHNICAL FEATURES OF PIMAPAY

We use pimacoin as the internal mechanism for interaction within the entire pimapay ecosystem (Used protocol is the multichain blockchain)

Permissions, (mining and admin), hoarding, rely on pimacoin only.

Withdraw and convert your either earned or profited pimacoin to your local currency instantly.

Also Pimacoin will be available on the Web, Desktop (Windows, MacOS, Linux), mobile (iOS, Android)

DIGITAL DISTRIBUTION OF PIMACOIN WITHIN OUR ECOSYSTEM

Limited amount of pre-mined pimacoin will be issued during the coin sale. This in return can become profitable either by being traded against other currencies, hoarded, and even sent to somone with or without a Pimacoin wallet.

● We will be sharing profit generated by the platform to all Pimacoin holders.

● Pimapay is a comprehensive and multifunctional system built with both business owners and end users in mind. Sending and receiving money becomes very easy and the integration of Pimapay can be implemented through a merchant API (simple to do).
